

Job Title: Working Student (m/f/d) - Industrial IIoT

Posting Start Date: 7/28/26

Reference ID: 43232

Are you looking for a working student job where you can do more than just watch? Or do you want to focus your thesis on something that is really in demand in the industry? Then Döhler is exactly what you're looking for! As a global producer, marketer and provider of technology-driven natural ingredients, ingredient systems and integrated solutions for the food and beverage industry, we are looking for people just like you, who are inquisitive and want to break the mould. People who are motivated to deliver only the best.

This position is based at our headquarters in Darmstadt (on-site).

Your Role

- You will support us in building and operating our IIoT cloud ecosystem across both cloud and edge environments
- You will help roll out solutions to our plants worldwide and contribute to the global implementation of digital use cases
- You will independently develop data-to-value applications that create real impact
- You will be involved in international digital pilot projects, for example in Robotics, Smart Factory, AR, and VR

Your Profile

- You have a strong interest in programming and are currently studying a technical subject
- You are enthusiastic about new technologies, especially in the field of IIoT and Digital Production
- You are eager to work with topics such as MQTT, Docker, Hyperscaler Cloud Environments, Node-RED, or OT Networking
- You enjoy learning new topics and quickly familiarizing yourself with unfamiliar technologies
- You communicate confidently in English

Your Benefits

- Fully AI driven toolchain, cutting edge technology
- The motivating working atmosphere, of a high-tech, innovative company
- The possibility to realize your own ideas
- The chance of experiencing new ways
