

## **Internship or Working Student: Platform Strategy for the Energy Market**

This is a great opportunity for a motivated student with self-drive, initiative and entrepreneurial spirit to work on key strategy topics for the future energy transition goals. The student will work closely with the Vice President of Platforms at Viessmann to analyze market developments, identify key use cases for combining energy transition goals with personal comfort requirements of the end user, and come up with a strategy on how to apply a platform approach to solve the customer needs in this sector.

### **...your mission**

- Analyze the scope of existing platform components / algorithms that focus on energy management
- Identify customer needs and requirements that focus on smart climate and personal comfort
- Develop concrete proposal on building (or) buying specific platform components to combine energy optimization, climate controls and adaptive climate requirements
- Identify gaps in the existing IoT infrastructure and platform components to solve the business problems
- Identify key partners and their offerings / API's that would add value to the Viessmann offerings

### **...your profile and skill set**

- Master's or Bachelor's student in economics, business management, energy engineering, computer science or a related field at a university or university of applied sciences
- Knowledge of IoT platforms from a business perspective and key market players in the renewable energy sector
- Hands on experience with Google Suite or Microsoft Office tools
- Strong communication skills and good English writing skills
- Very good presentation skills
- Proactive and a well structured, goal oriented work style

### **Nice-to-have:**

- Prior experience in market research, strategy frameworks and IoT platform technologies
- Familiarity with heating, ventilation and air conditioning systems
- Experience with agile development processes (e.g. Scrum) and task management tools (e.g. Asana)

### **...what we have to offer**

- Supervision by experts in platform technologies and energy management
- Competitive salary
- Flexible hours and mobile working opportunities
- Office in the heart of Berlin
